

Mr. Ganesh Ramkrushna TeliPune, India | +91-8007477357 | ganeshтели17@gmail.com | Portfolio: [ganeshтели.github.io](https://github.com/ganeshтели)**Summary**

- Software Engineer with 9+ years of experience delivering scalable, secure Java, Python and AWS solutions for financial, banking and telecom.
- Specialized in microservices architecture, Spring/Spring Boot, Hibernate/JPA, REST/GraphQL APIs, asynchronous programming and modern Java (Java 8/21).
- Proficient with AWS cloud services and backed by AWS Certified Developer – Associate and AWS Certified Solutions Architect – Associate credentials.
- Adept at applying core engineering principles, including object-oriented design, SOLID, data structures & algorithms, design patterns, code review and refactoring.
- Effective Team player, Result-oriented, Self-driven and Ready to Learn new technologies.
- Result-driven, self-motivated, collaborative and eager to learn new technologies.

Skills

- Languages: Java, Python, Typescript, SQL
- Databases : MySQL, IBM DB2, PostgreSQL, H2, SQLite
- Frameworks: Spring, Spring Boot, Hibernate/JPA, Django, Flask, Apache Spark/Pyspark
- Cloud : AWS, Snowflake, Azure Databricks
- Security: JWT, LDAP, SSO, OAuth, OIDC
- Monitoring: Dynatrace, Nabl9, Kibana
- Tools: Git, GitHub, Confluence, Jira, Postman, Swagger, Docker, DBeaver, Genesys, IBM Liberty, WebSphere, IntelliJ, VS Code

Experience**Principal Financial Group - Senior Software Engineer****Sept 2024 - Present, Project: Conversational Quality Assurance (EEE- Platform)**

- Promoted to Senior Software Engineer while driving architecture, delivery ownership, security and mentoring for the Conversational Quality Assurance Platform.
- Enabled web messenger and video interaction channels for the participant contact center by integrating vendor platforms with web applications.
- Built and published a new package to the internal artifactory repository for Genesys Web messenger with improved security, reusability and documentation.
- Designed and implemented chat masking service to protect sensitive information in chat messages, ensuring compliance with data privacy regulations.
- Tuned IBM Liberty application servers, reducing maintenance and license costs by \$142,480 per year.
- Mentored junior developers on enterprise standards, code quality and problem solving.
- Led team initiatives to reduce security debt, lead time for changes and increase deployment frequency.
- Implemented disaster recovery and high availability strategies for AWS-hosted services.
- Improved Genesys EDF data loading and optimized Snowflake warehouse usage, reducing costs by more than \$850 per year.
- Improved Qualtrics EDF integration by implementing batch processing that cut API requests by 70%, added robust retry handling and reduced costs by over \$1,650 per year.

Principal Financial Group - Senior Software Engineer**May 2022 – Sep 2024, Project: Conversational Quality Assurance (EEE- Platform)**

- Developed ETL workflows to export Qualtrics data into Snowflake using PySpark, AWS Glue, Lambda, S3, SNS and Snowpipe.
- Optimized AWS Glue data processing by switching from CSV to Parquet, improving performance and saving approximately \$1,000 per year.
- Created Snowflake data products, tables, views and functions to support engagement center analytics.
- Facilitated data science teams with data models, business attributes and machine learning readiness.
- Applied AWS Well-Architected Framework best practices for cloud application design and operations.

- Facilitated design reviews, architecture reviews, technical demos and risk assessments.
- Resolved security vulnerabilities identified by GitHub Dependabot, Wiz, Endor Labs and Fortify.
- Migrated code repositories and CI/CD pipelines from Bitbucket/Bamboo to GitHub/GitHub Actions as part of an enterprise initiative.

Barquecon Technologies - Software Engineer

July-2021 - May 2022, Project: ENI Analytics (IoT-based asset performance, health monitoring and energy intelligence)

- Responsibilities include requirement analysis, preparing use cases, documentation and development.
- Analyzed requirements, defined use cases, documented design and shaped solution architecture.
- Designed and developed REST APIs and backend services to support telemetry and analytics.
- Implemented serverless workflows using AWS Lambda, SNS and SQS.
- Implemented fallback, monitoring and alerting mechanisms.
- Built import/export pipelines and data models for analytics and reporting.
- Delivered feature enhancements and performance improvements.
- Automated routine processes with cron scripts to improve reliability and efficiency.

Education

- Bachelor of Engineering in Electronics and Telecommunication Engineering with First Class from Government College of Engineering Jalgaon.

Certification and Achievements

- AWS Certified Developer - Associate.
- AWS Solutions Architect - Associate.
- Developing Machine Learning Solutions by AWS.
- Advanced Developing on AWS by LearnQuestLearnQuest.
- Databricks level 200 - Data ingestion with Delta Lake.
- AWS Security Essentials by AWS.
- Apache Spark on Databricks by Pluralsight.
- Advanced Spring: Effective Integration Testing with Spring Boot by LinkedIn.
- Microservices and RESTful web services with Spring and Spring Boot by Udemy.
